Wed., Nov. 17 Launch 12:09 p.m. (EST) (Launch window - 12:09 p.m. to 1:09 p.m. (EST))

Click on the Mgr button to open the window for updating

Welcome to Site Manager.

Once the initial parameters of a new site have been created using the Site_INITIALIZER, the Site Manager is used to build the site from layout to navigation to populating content to publishing.

There are 7 steps to create a site for the first time.

These sections correspond to the buttons on the right hand side menu.

Each section must be done in order and completed before you can move to the next section.

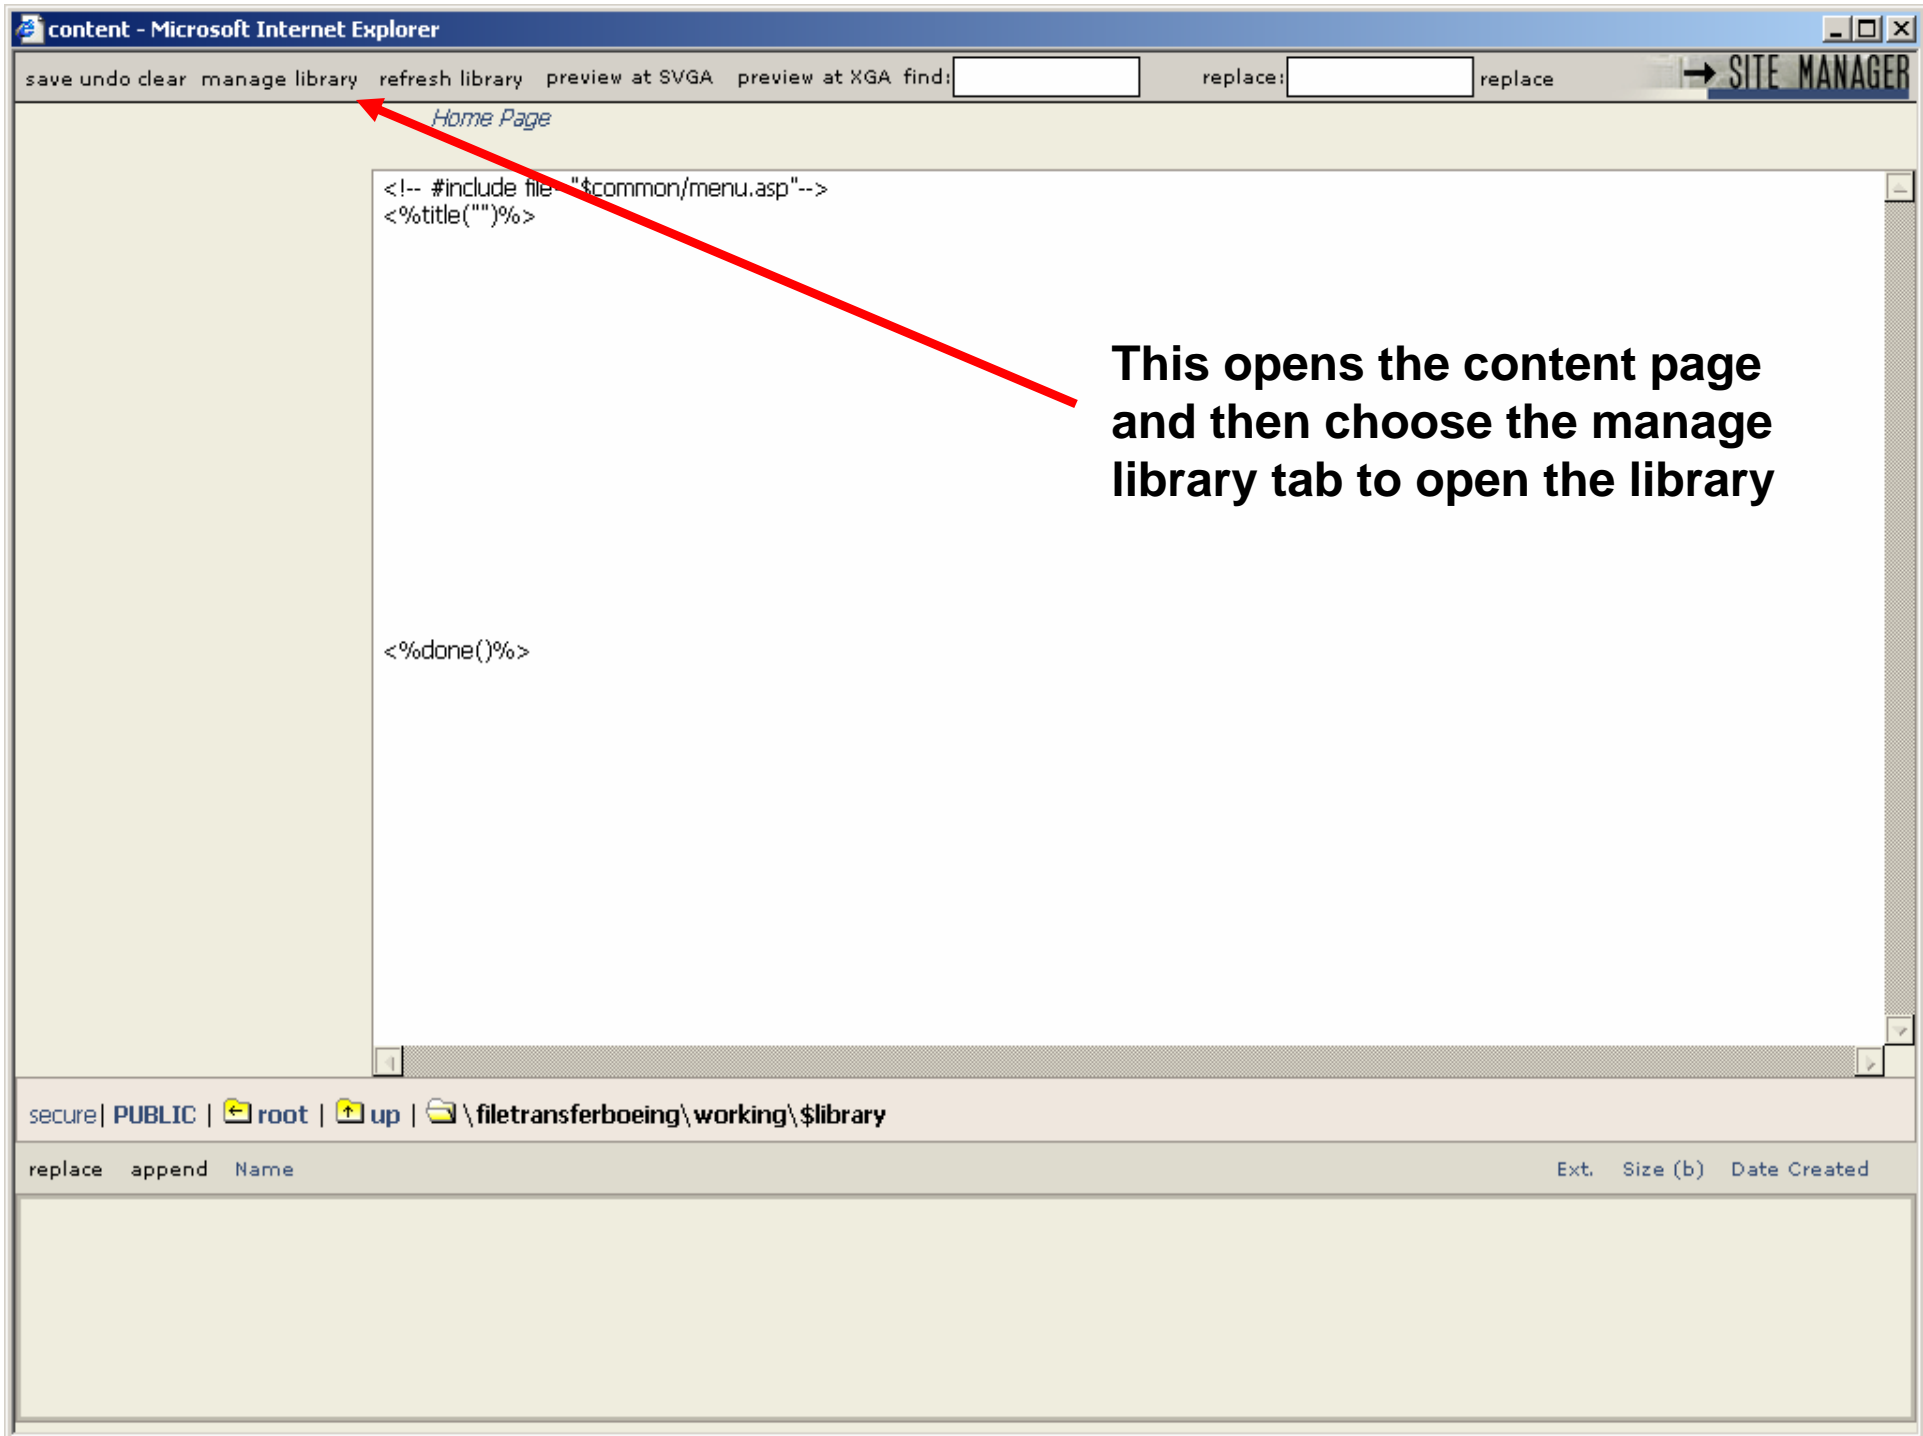

They are:

- 1) Template
- 2) Title
- 3) Main Menu
- 4) Sections
- 5) Footer
- 6) Content
- 7) Publish

Choose the content button

-  template
-  title
-  main menu
-  sections
-  footer
-  **content**
-  publish

After a site has been created Site Manager can be revisited to update the menus, sections, footers, and content. To enable changes and bring them to a live status use the Publish function.

Upload new Library Files - Microsoft Internet Explorer

Library / Upload

SECURE | public | root | up | /filetransferboeing/working/\$library

Drag files into the window or select files with the select button. To upload files into the library, click the upload button.

Name	Thumbnail	Ext.	Size (b)	Date Created
<input type="text"/> Create New Folder				

Delete Checked Files and Folders

Files Size

File Folder

Remove Remove All

Upload

In the library window click on the SECURE tab

Then click on the File button and a select files for uploading will be opened. For this example we will upload the TEST. Pdf from the Desktop

Select Files for Uploading

Look in: Desktop

- My Documents
- My Computer
- My Network Places
- WinZip
- Stuff
- DI LVRR Schedule.ML8
- DI LVRR Schedule.pdf
- Milestone.schedule.xls
- TEST.pdf
- THE REAL YELLOW PAGES LIVE!
- Windows Explorer

File name: TEST.pdf

Files of type: All Files (*.*)

☐ Open as read-only

Open Cancel

Start | Outlo... | KSC ... | E:\EL... | Adob... | Micro... | conte... | Uplo... | 10:03 AM

Upload new Library Files - Microsoft Internet Explorer

Library / Upload

SECURE | public | root | up | /filetransferboeing/working/\$library

Drag files into the window or select files with the select button. To upload files into the library, click the upload button.

Name	Thumbnail	Ext.	Size (b)	Date Created
<input type="text"/> <input type="button" value="Create New Folder"/>				

Files (1) Siz...

C:\Documents and Setti... 8,3...

The file will then be loaded into the Files area.

Note that multiple files from multiple directories can be uploaded at the same time

Click on the Upload button when all files are ready and the file(s) will be transferred into the library

Library / Upload

SECURE | public | root | up | /filetransferboeing/working/\$library

Drag files into the window or select files with the select button. To upload files into the library, click the upload button.

	Name	Thumbnail	Ext.	Size (b)	Date Created
<input type="checkbox"/>	TEST.pdf		pdf	8320	10/25/2004 10:11:12 AM
	<input type="text"/>	Create New Folder			

Click on OK

**The file(s) have been loaded and this window can be closed.
This will return you to the contents page.**

For Reference there is a delete files option located on this screen for removing files also

content - Microsoft Internet Explorer

save undo clear manage library refresh library preview at SVGA preview at XGA find: replace: replace SITE MANAGER

Home Page

```
<!-- #include file="$common/menu.asp"-->
<%title("")%>

<%done()%>

<a href="<%securefile("TEST.pdf")%>">TEST.pdf</a>
```

To bring the new file into the portal site click on the SECURE link

Then choose the up arrow located on the append tab.

This will place the file with it's respective html coding into the portal site area

SECURE public | root | up | \filetransferboeing\working\\$library

replace append Name Ext. Size (b) Date Created

↺	↑	TEST.pdf	pdf	8320	10/25/2004 10:11:12 AM
---	---	----------	-----	------	------------------------

content - Microsoft Internet Explorer

save undo clear manage library refresh library preview at SVGA preview at XGA find: replace: replace **SITE MANAGER**

Home Page

```
<!-- #include file="$common/menu.asp"-->
<%title("")%>

<a href="<%securefile("TEST.pdf")%>">TEST.pdf</a>

<%done()%>
```

Cut the html associated text from the bottom of the page and paste it above the <%done()%> html information

Choose Save to complete the page update.

Note that should a link need to be removed from the site just delete the html text associated with that link, then save.

SECURE | public | root | up | \filetransferboeing\working\\$library

replace append Name Ext. Size (b) Date Created

		TEST.pdf	pdf	8320	10/25/2004 10:11:12 AM
